## 7 Year Guarantee

Our 7 Year Guarantee ensures that if any aspect of your project is compromised by forces within our control - we'll redo it free, giving you complete peace of mind.

## Local Family Business

Situated in the Blue Mountains and working in the surrounding areas, we are passionate about our community and strive to offer a great service.

## Skilled, Friendly Team

Our team of skilled workers have been selected for their courteous, polite and friendly nature. We'll leave your property clean and tidy with no mess to clean up.

## Quality Workmanship

With over 18 years in the landscaping industry we know that focusing on the details creates beautiful outdoor spaces that not only look amazing but suit your lifestyle.

## A Creative Vision

THE LANDSCAPED GARDEN, specialising in residential garden transformations. Our goal is to create beautiful, functional outdoor living spaces of exceptional quality. With vast landscaping experience and creative vision and craftsmanship THE LANDSCAPED GARDEN will give your outdoor spaces an impression that lasts the seasons.

## We Listen

We pride ourselves on being good communicators. Our appointment process is an important time of hearing what you would like to achieve with your outdoor living areas. We value your ideas, and feedback, and will work with you throughout all stages of landscaping to ensure your project is run smoothly, hassle free.

## Guaranteed Quality

All our work comes fully guaranteed and if it moves within 7 years we will redo it for free. We'll maintain our high standard of craftsmanship across all areas of the project to ensure you are completely satisfied with the finish.

This sizeable landscaping project put the finishing touches on this exquisitely detailed, family home.

## Garden Surrounds

Neat, flourishing gardens surround this Emu Plains home and interweave with functional entertainment spaces - creating a beautiful, private sanctuary.

Coved texture on concrete driveway creates a non-slip surface.

Custom built automatic gates

The young Buxus Plants will develop into a stunning hedged entrance way

Tiled Blue Stone path.

Formal gardens featuring Buxus Japonica hedges, Gardenias, Sasanqua Camellias and Murraya Paniculata.

Tiled Blue Stone path, laid in Ashlar Pattern

A Sandstone Fire Pit and Sitting area is a great addition to the entertainment area giving space for family and friends to unwind.

Weeping Maples feature in the corners of this central space, contrasting the large sandstone steppers

Three Manchurian Pear Trees create the backdrop to the fire pit sitting area

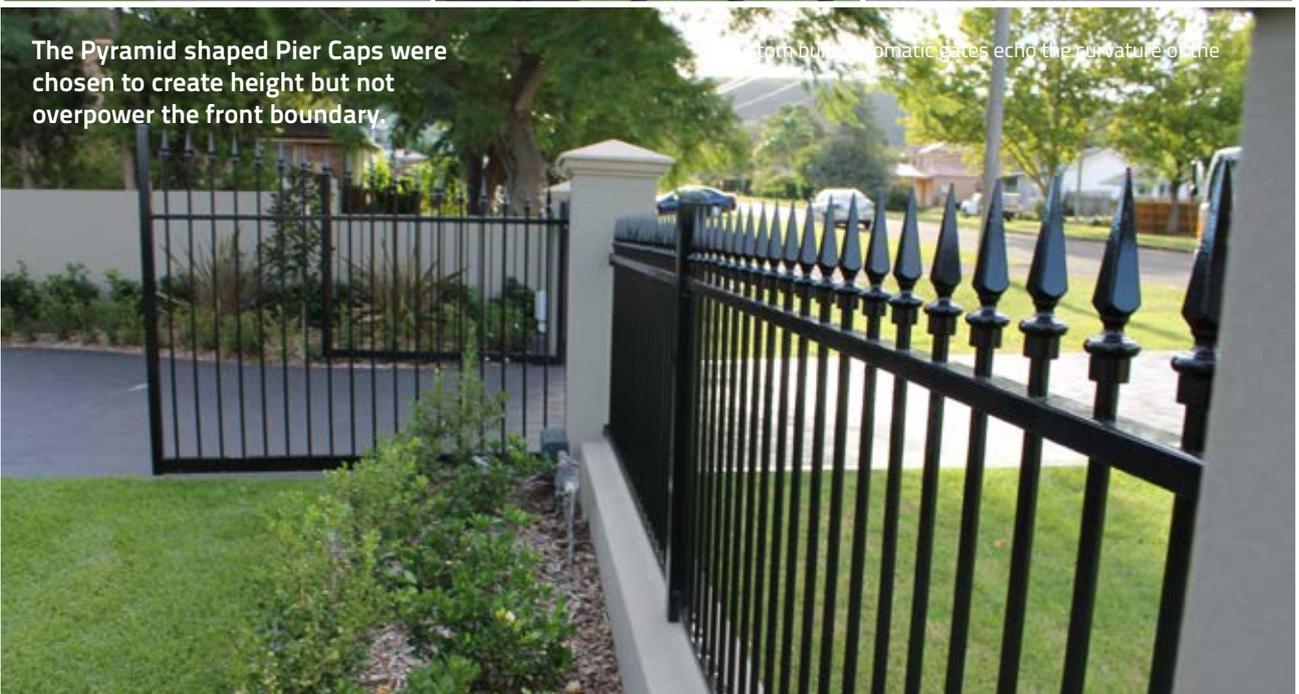

Fire pit sitting area.

The front rendered Hob Walls and Piers with integrated lighting compliment the architecture of the house.

The Pyramid shaped Pier Caps were chosen to create height but not overpower the front boundary.

Automatic gates echo the curvature of the

Sandstone Steppers

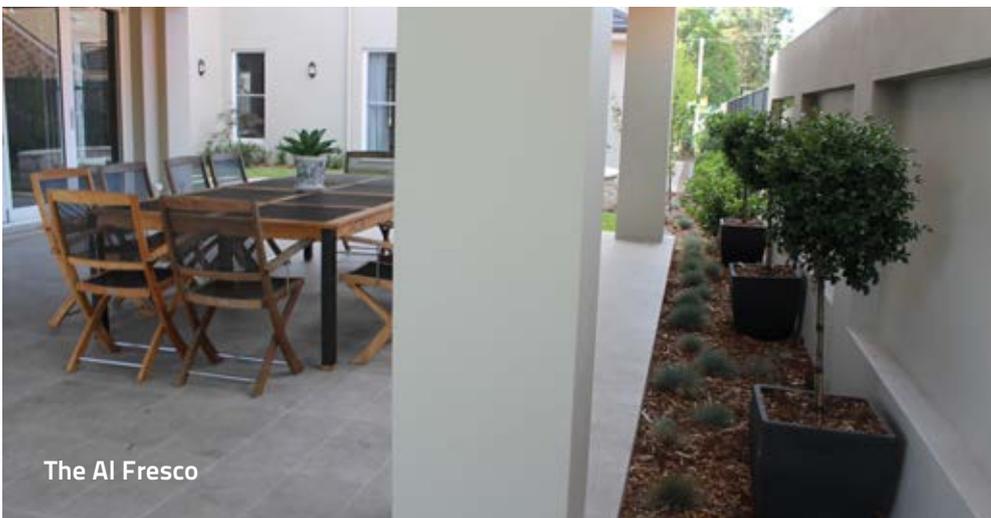

Round River Pebbles

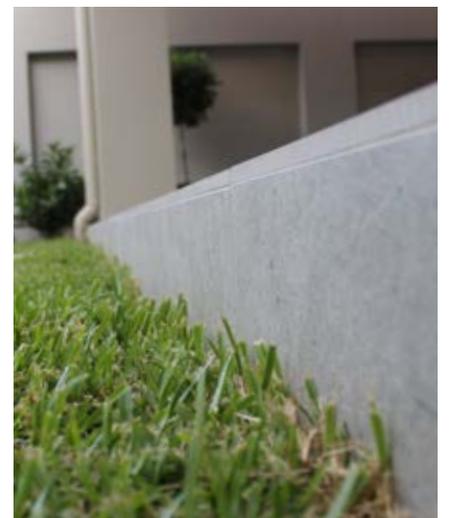

Sandstone steppers feature in many pathways surrounded with Round River Pebbles.

Topiary Standard Lilly Pillis feature in front of the rendered niches, which gives height and depth to the expansive AI Fresco.

The AI Fresco

The tiled Blue Stone path, laid Ashlar Pattern, leads you through two open lawn areas to the Front Porch, with neat brick edging bordering the gardens

Neat brick edging bordering the gardens

Low Allergenic and Evergreen  
Palmetto Buffalo Turf

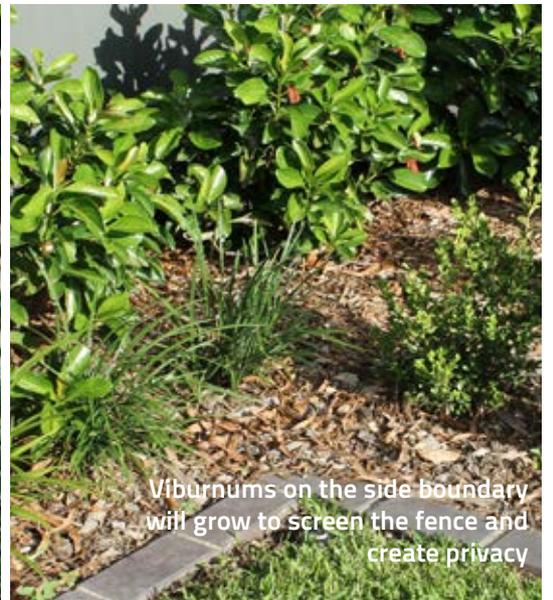

Buxus Japonica

Magnolia 'Little Gem' tree

Magnolia 'Little Gem' trees feature in each corner.

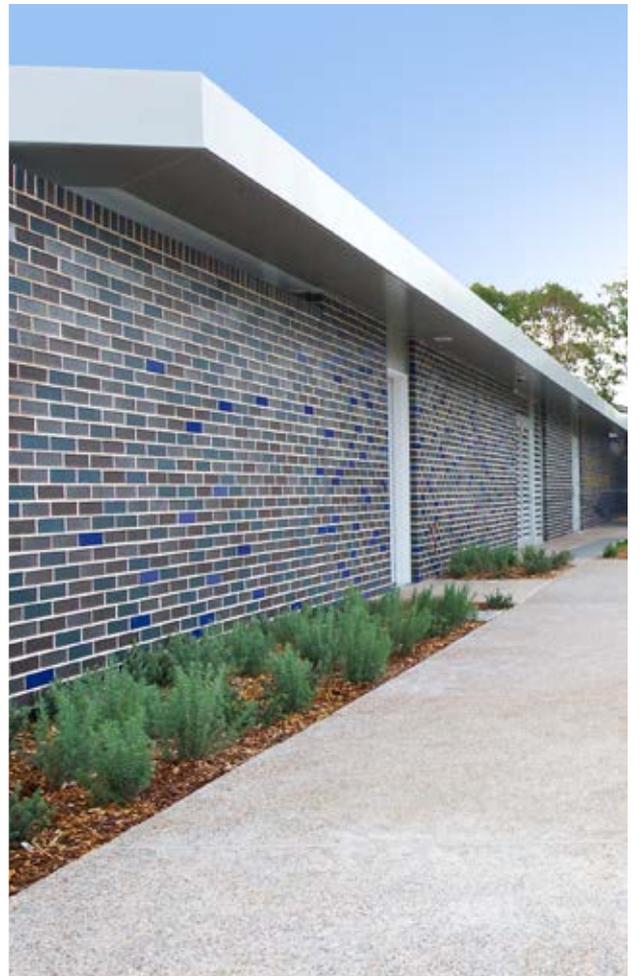

Viburnums on the side boundary will grow to screen the fence and create privacy

Low Allergenic and Evergreen Palmetto Buffalo was used to turf this family's backyard

A Recent Commercial Project

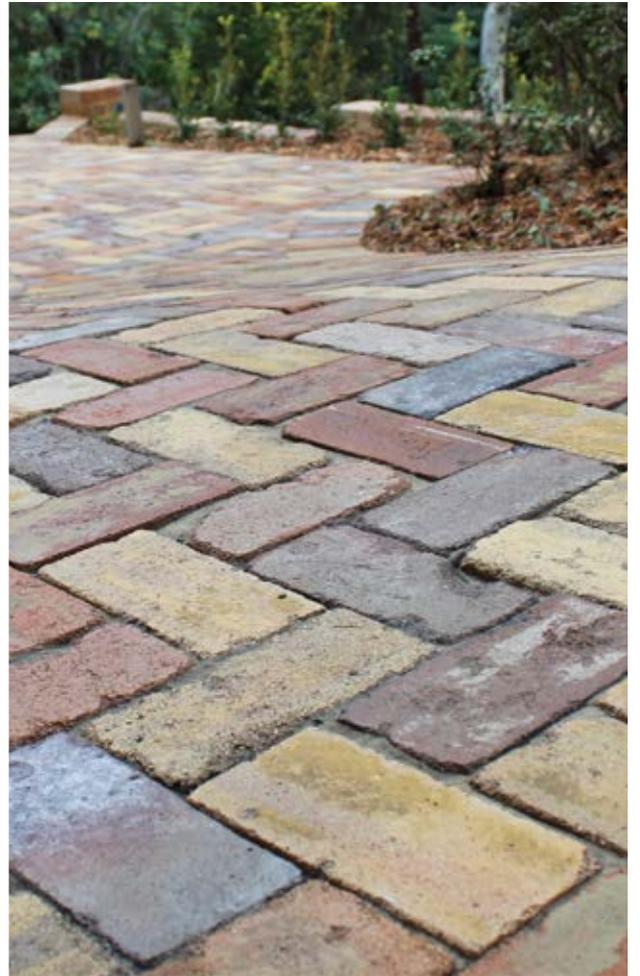

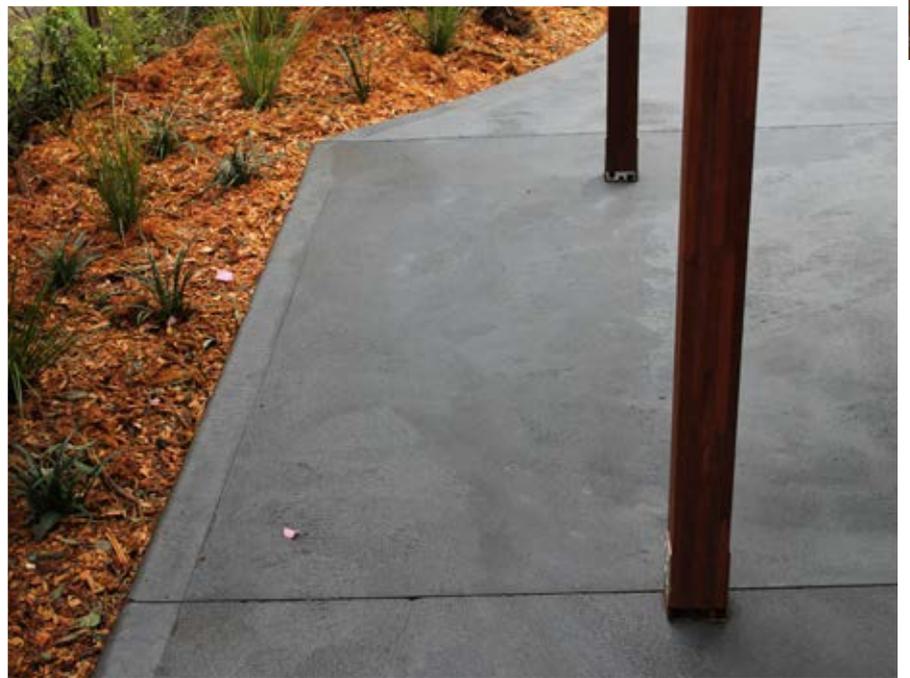

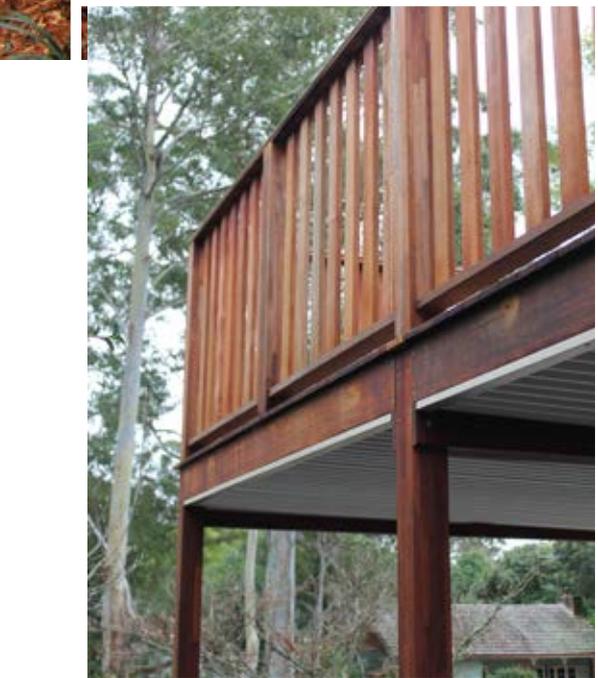

Before

After

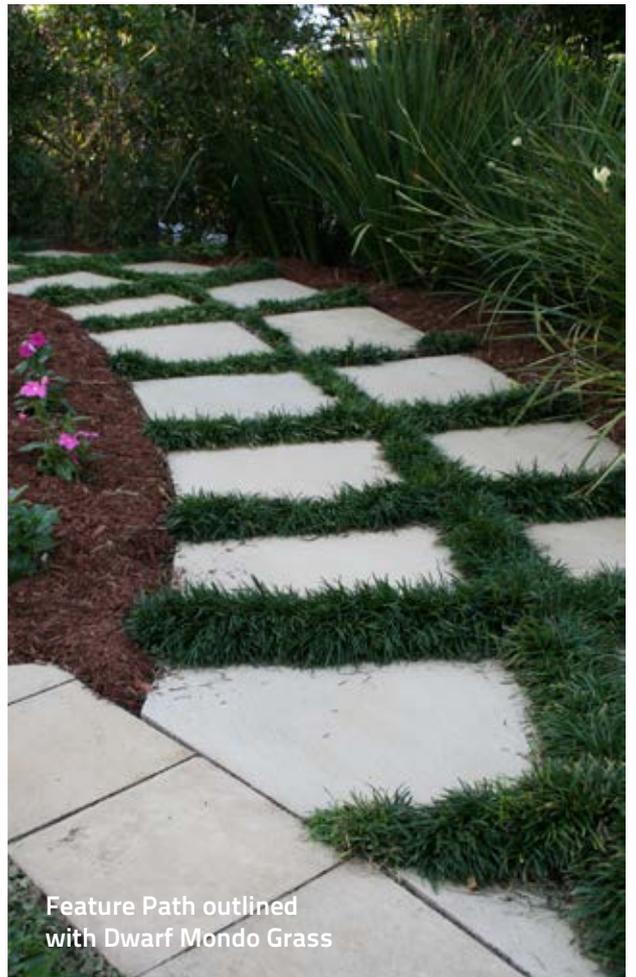

The backyard transformation gives this family a huge space to enjoy time together

Small Level Lawn Area with the flowing curves of the Rendered Retaining Wall creates a relaxed pause, connecting the Octagonal Pavillion and the Pool

Palmetto Lawn

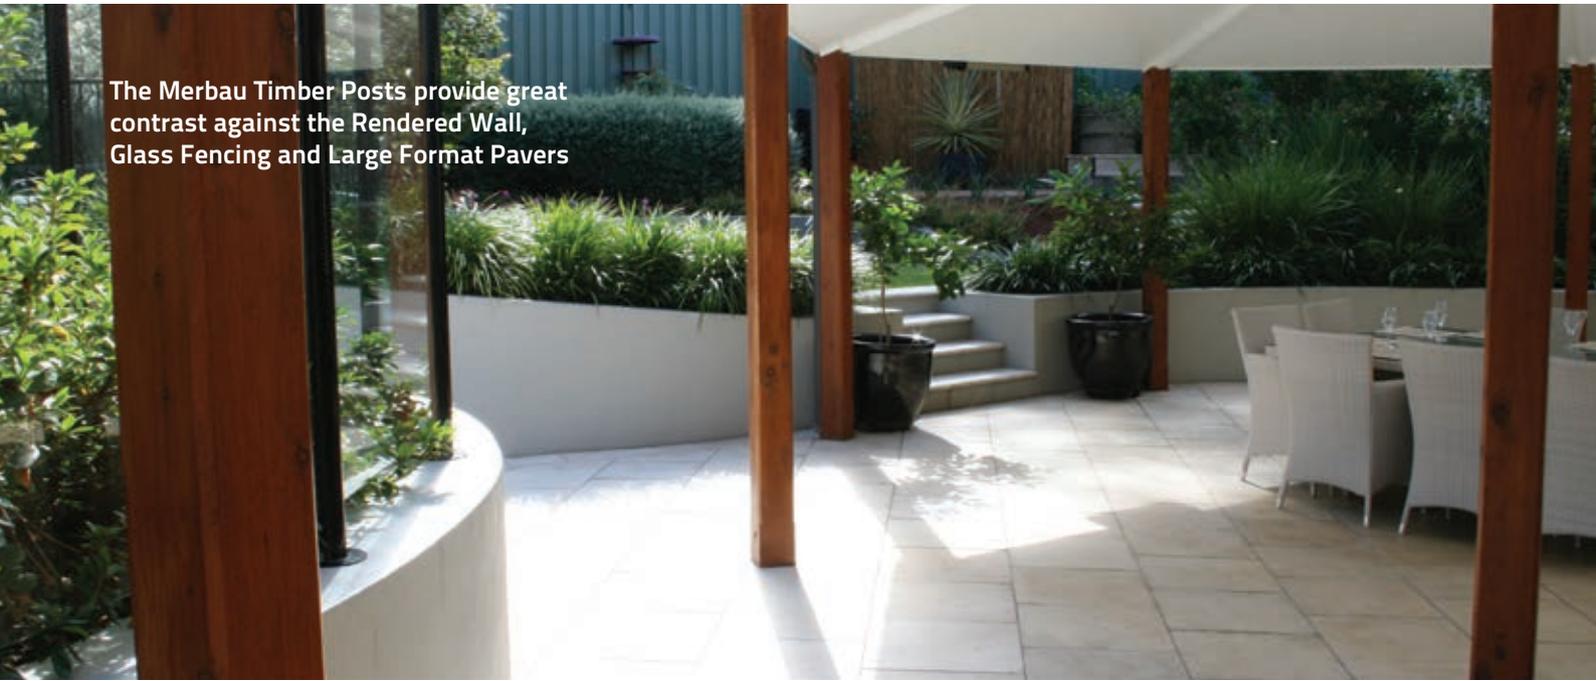

Feature Path outlined with Dwarf Mondo Grass

Paved Area of Octagonal Pavillion

The Merbau Timber Posts provide great contrast against the Rendered Wall, Glass Fencing and Large Format Pavers

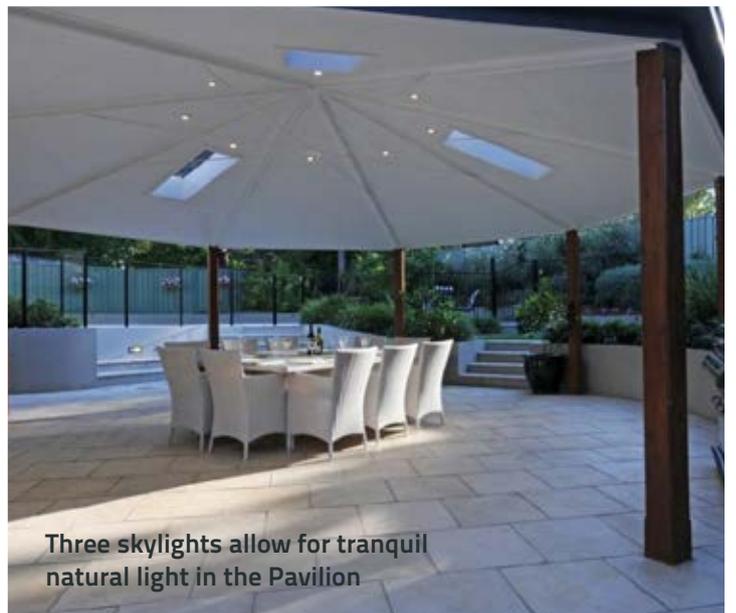

The Octagonal Pavilion is the key focal point of this transformation. This iconic entertainment area is surrounded by and open to the gardens

The Curved Bull-nosed Paver Stairs create a stunning Pool entry

Three skylights allow for tranquil natural light in the Pavilion

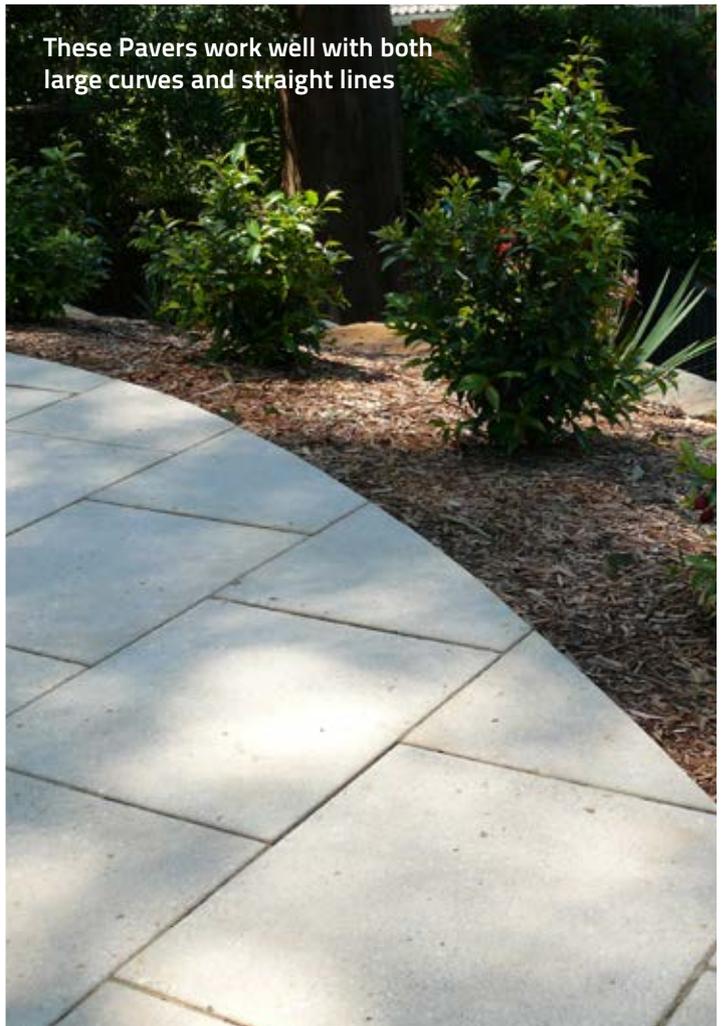

This unusable and steep backyard was terraced with Sandstone Boulders creating manageable gardens, and an upper paved area which took full advantage of the river views

These textured Concrete Pavers connect the Deck and main outdoor spaces. Outlined with Native Grasses to soften the edges

These Pavers work well with both large curves and straight lines

The non-slip surface provides a safe entry to the property

Concrete Sleepers bordering garden and path areas

Corner of Concrete Sleeper Veggie Garden

Long lasting Concrete Sleepers create a Veggie Garden Retaining Wall with a rustic appeal

Rock-faced Sandstone  
Ballast Garden Edging

Letterbox capped with  
50mm Sawn Sandstone

Sandstone Boulders create an  
economical terrace to provide  
transition between adjoining levels

These beautiful Xanthorrea Australis  
(Grass Trees) are featured within this  
native garden

Standing 1.8m tall, this stunning Water Feature Urn is the focal point of this backyard

The beautiful grain in this Gosford Sandstone Capping is showcased on these Acrylic Rendered Walls

Anigozanthus  
(Kangaroo Paw)

Large Format Paved Pathway

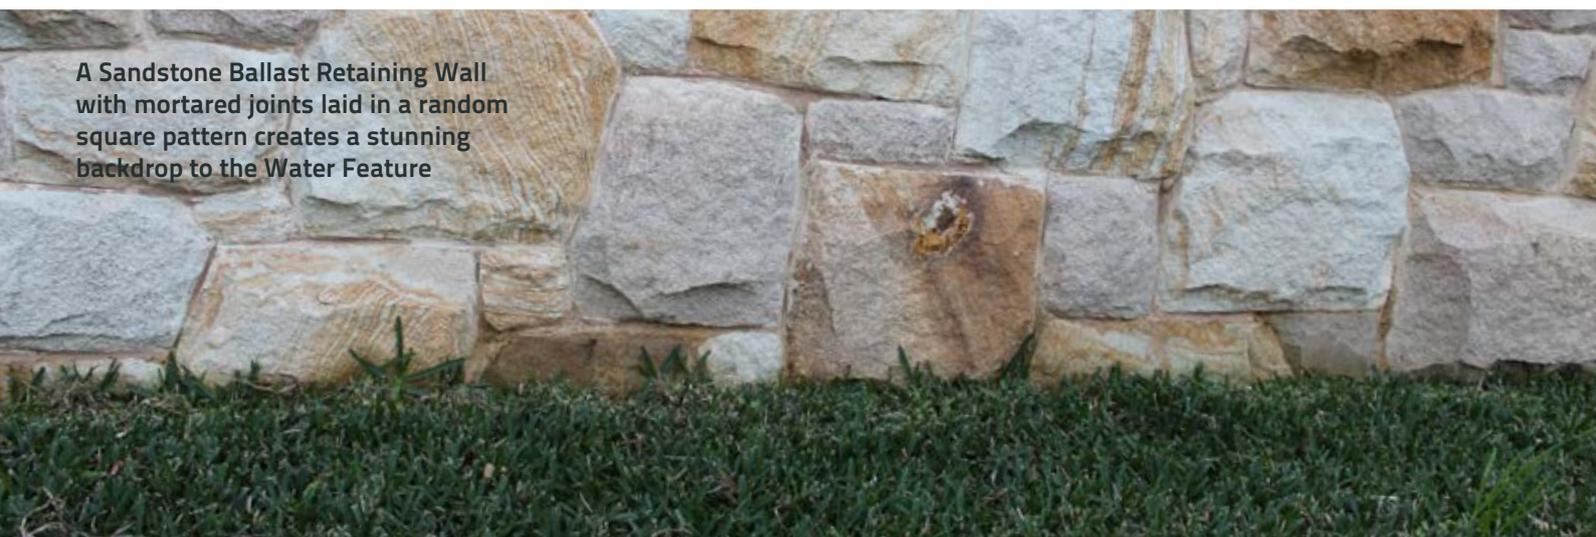

50mm Sawn Gosford Sandstone Capping, Rock-Faced on the front edges.

This family specifically requested a garden full of Native Plants which would attract the local birds. Plants include Banksias, Grevilleas and Proteas.

A Sandstone Ballast Retaining Wall with mortared joints laid in a random square pattern creates a stunning backdrop to the Water Feature

Acrylic Rendered Walls with 50mm Rock-Faced Sandstone Capping

The stepped wall levels provide many seating options for the whole family

These Colorbond™ Water Tanks, were made to size, feed the Integrated Drip Irrigation System and were designed to fit neatly along the service side of the property.

Outdoor storage was an important aspect for this family and so a quality Colorbond™ shed was made to fit the space.

## Bush Outlook

THE LANDSCAPED GARDEN enhanced this lovely bush setting with Retaining Walls and Sandstone Crazy Paving to create a cohesive and relaxing bush outlook

A close-up photograph of a garden wall and a set of stone steps. The wall is constructed from recycled bricks in various shades of red, orange, and brown. The steps are made of light-colored, flat stones. The scene is set outdoors with some greenery in the background.

Recycled Brick Garden Wall and stair entry provide transition to the Courtyard.

A close-up photograph of a brick wall, showing the texture and color variations of the bricks. The bricks are in shades of red, orange, and brown, with some showing signs of weathering and age.

The warm tones of Recycled Bricks are a popular choice.

The solution to this difficult grade in a bush setting was to utilise Sandstone Boulders, which retain the upper level terrace to this front garden. Completed by using Eucalypt Leaf Mulch and bordered by Lavender.

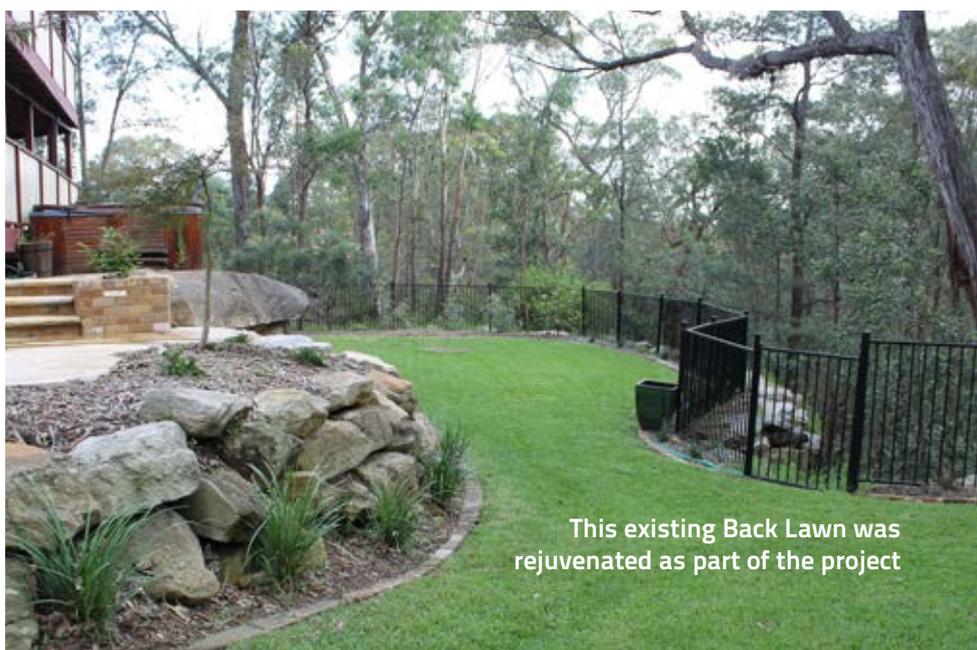

This easily maintained backyard provides great views of the bush and functional spaces for the whole family

These Sandstone Boulders were hand-picked for their beautiful grain and colour

Sandstone Crazy Paving Courtyard

This existing Back Lawn was rejuvenated as part of the project

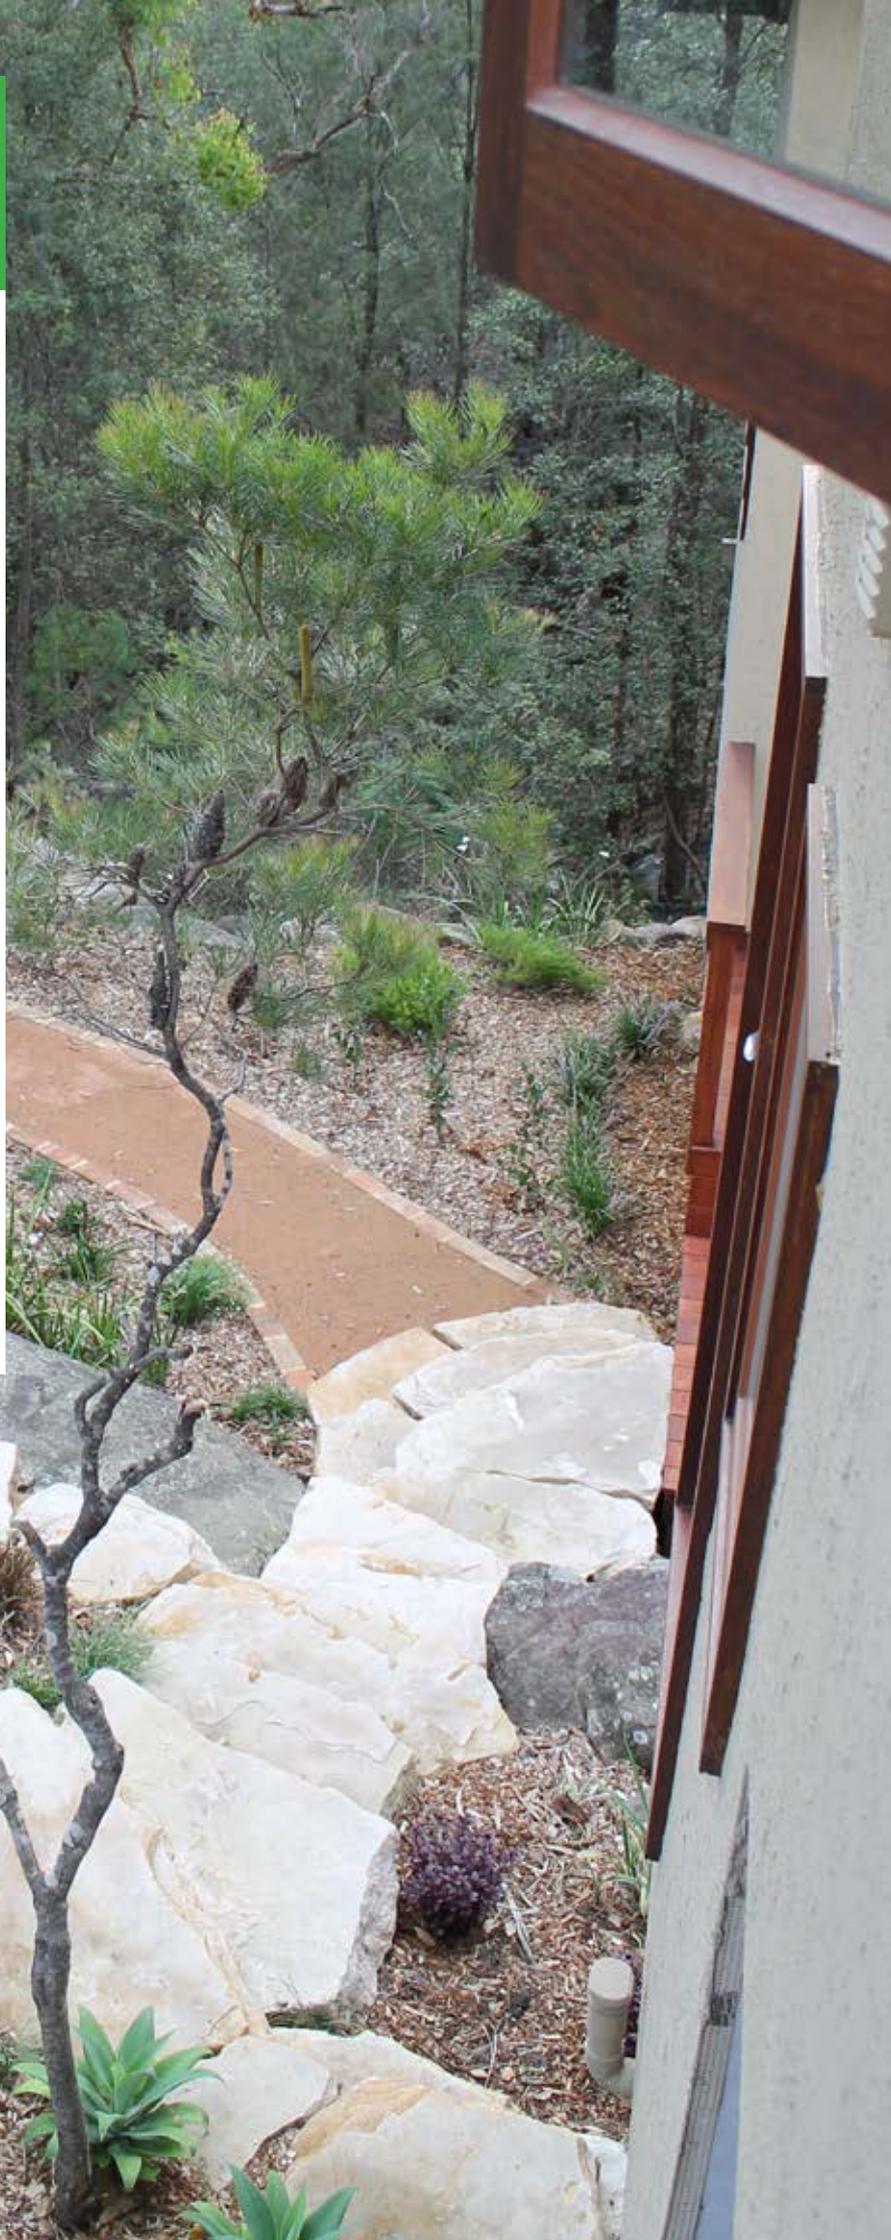

# Vantage Point

THE LANDSCAPED GARDEN completed this landscaping project on a steep Blue Mountains estate incorporating the huge existing rock shelf. The unusable slope was transformed into various functional areas that took great advantage of the bush views.

Large Sandstone Boulder Steps were hand-picked and carefully integrated as a winding path with the steep, natural rock shelf to create a transition through the front yard.

Decomposed Granite Pathways bordered by Recycled Brick Edging connect the various garden spaces, and compliment the natural tones and textures.

THE LANDSCAPED GARDEN provided the structural work for the outdoor spaces, which allowed this young professional couple to develop their garden with plants in their leisure time.

Beautiful grains featured in this rustic Sandstone Wall

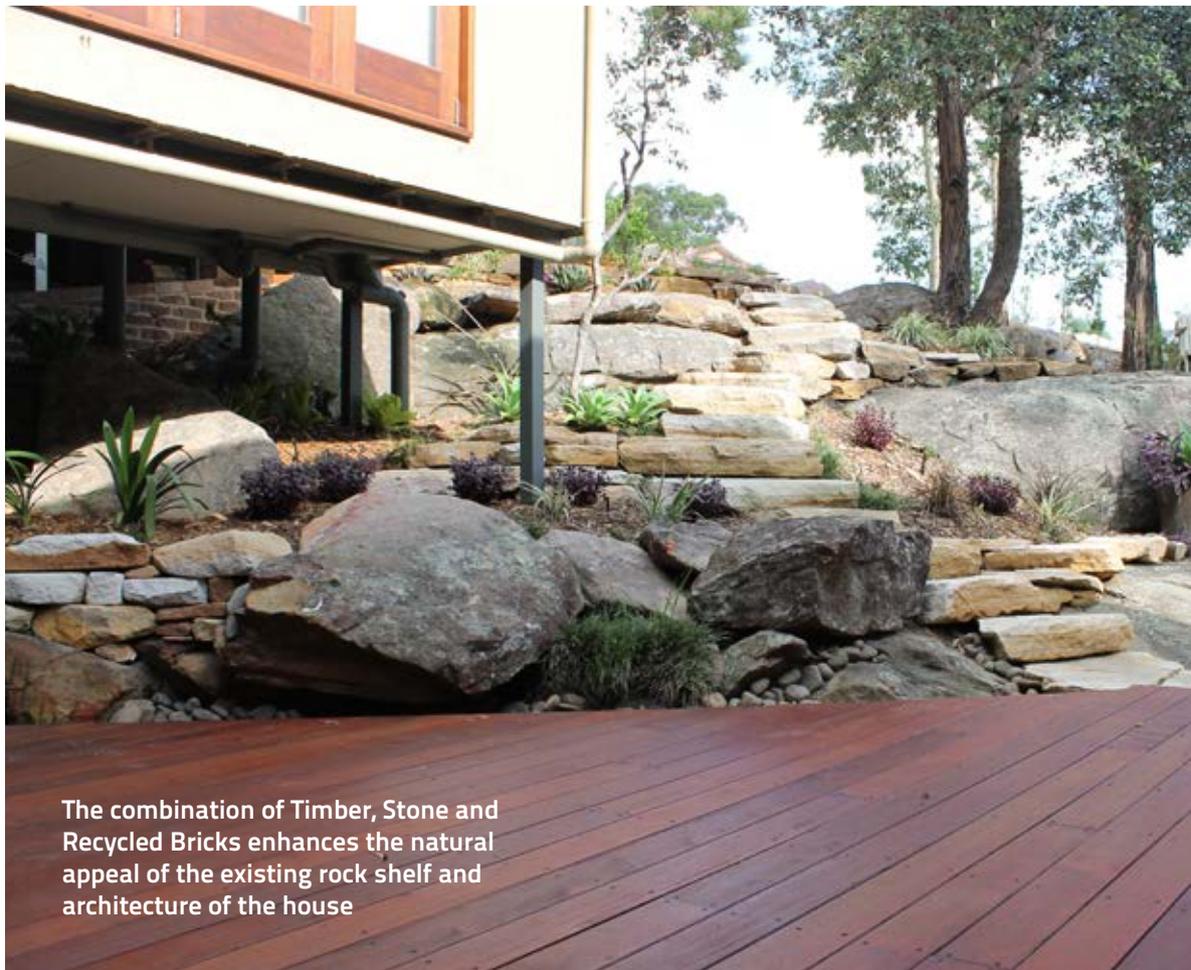

These Decomposed Granite Pathways are a hard-wearing surface, which are easy to maintain, and provide a great bush feel. The Paths link the concealed under-house Rain Water Tanks and Irrigation System with the garden spaces.

This Merbau Timber Deck provides yet another place to enjoy the bush outlook

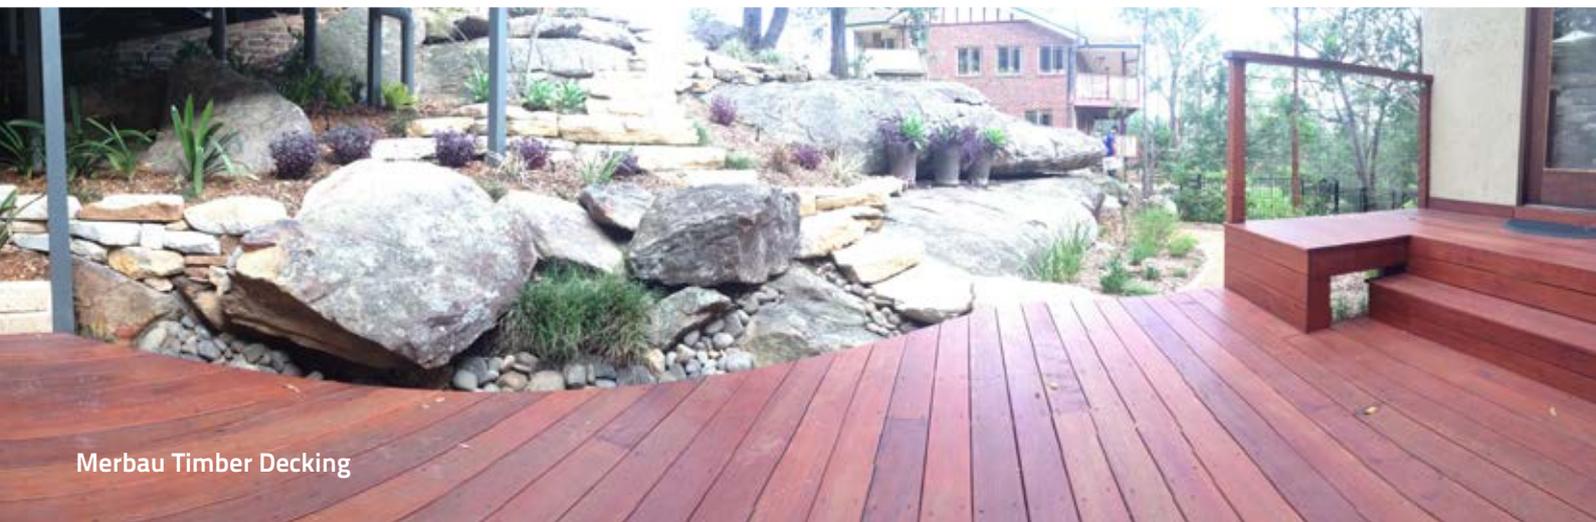

The combination of Timber, Stone and Recycled Bricks enhances the natural appeal of the existing rock shelf and architecture of the house

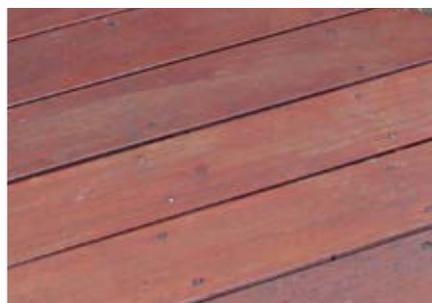

The Stainless Steel Balustrade provides safety as you enter the Lower Camelia Garden

The Tinted Decking Oil was carefully selected to enhance the existing timber elements of the dwelling

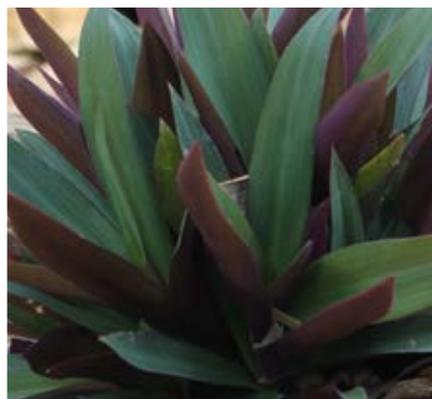

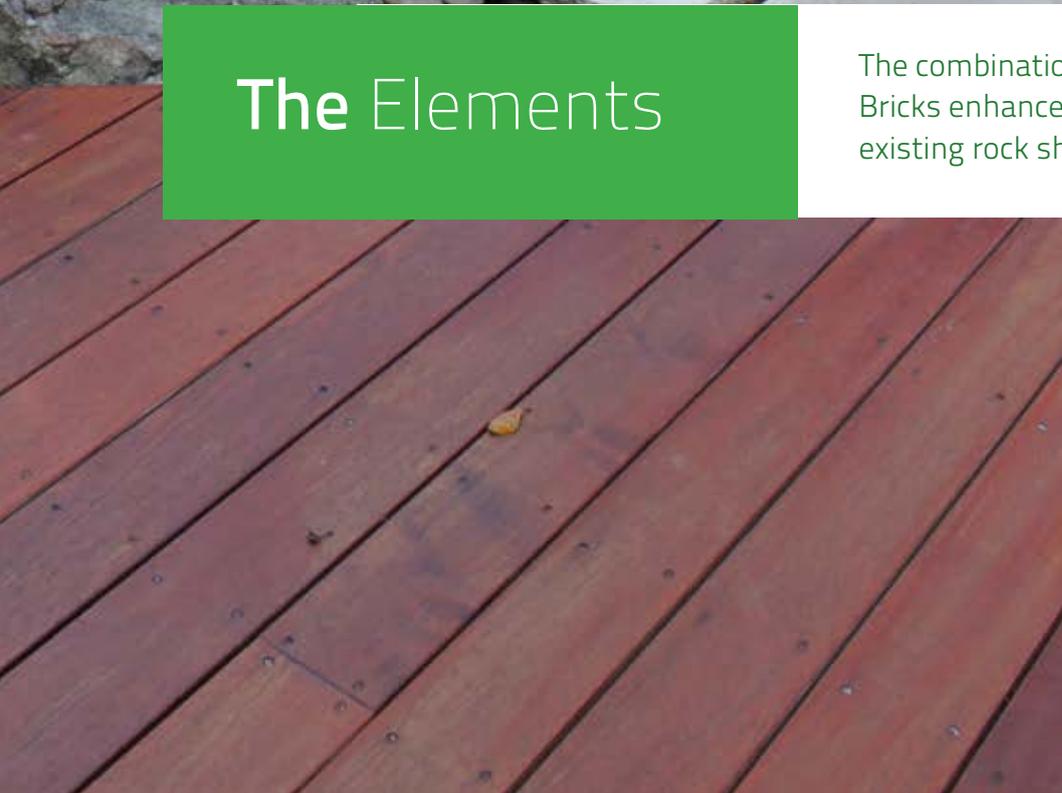

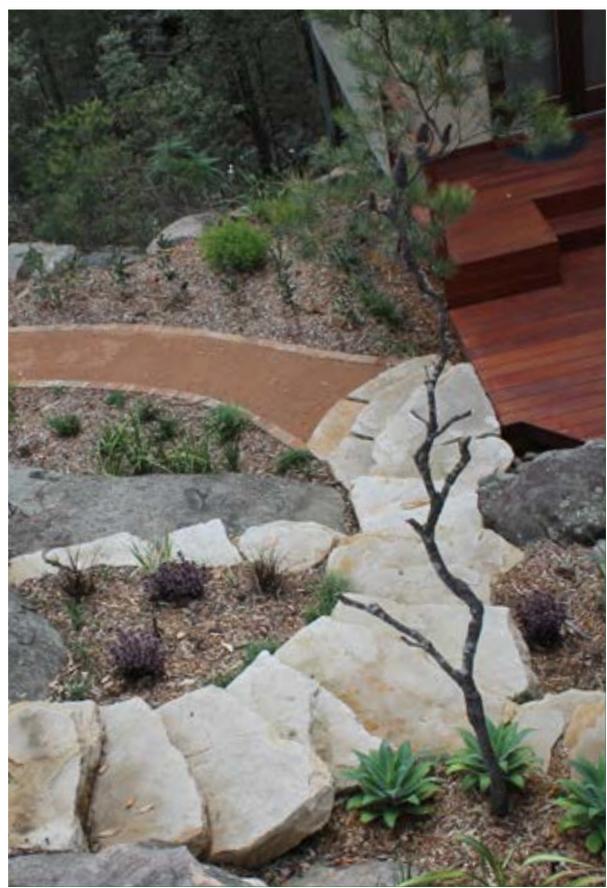

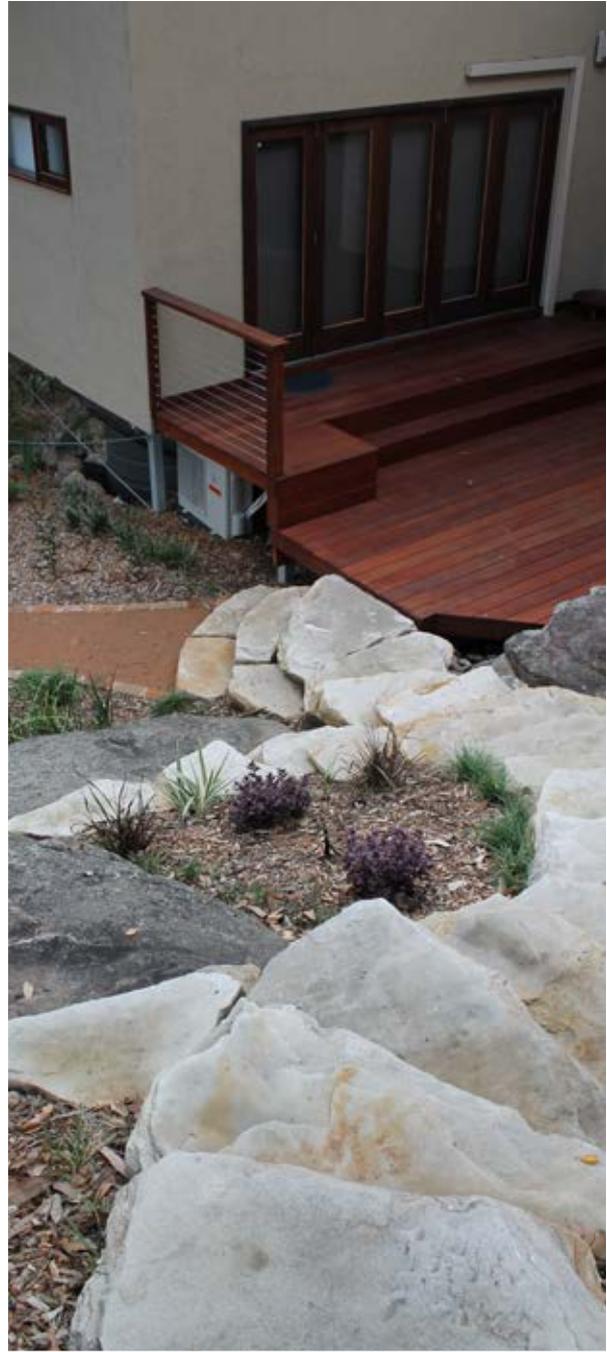

Merbau Timber Decking

## The Elements

The combination of Timber, Stone and Recycled Bricks enhances the natural appeal of the existing rock shelf and architecture of the house.

The existing Weathered Sandstone features in this lower area of the Garden

The new landscape design - along with the Retaining Walls, Gardens, Terraces and Pathways - had to integrate with a small amount of existing landscaping, as well as the house colour palette and style

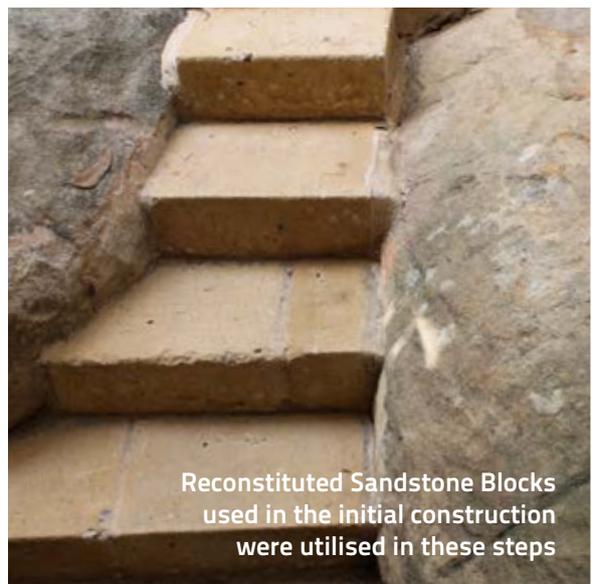

50mm Sandstone Crazy Paving  
Pathway leading from the cellar  
doors to the Dry Creek Bed

Recycled Bricks cleaned to  
expose their original colours

Reconstituted Sandstone Blocks  
used in the initial construction  
were utilised in these steps

Steps and Walling constructed  
on the Natural Rock Shelf

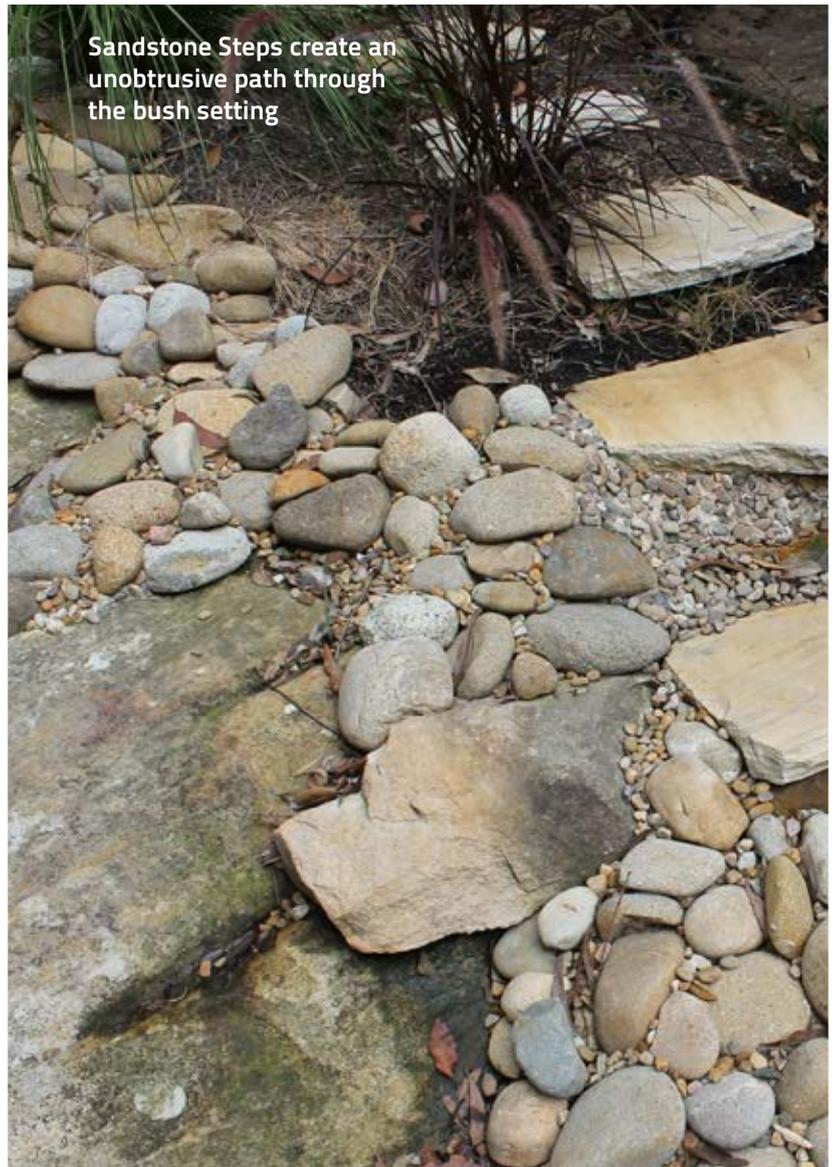

A new Dry Creek Bed provides a release point for rainwater overflow. Lucky Stones were laid on a Concrete Base and interplanted with Native Grasses

A Small Timber Hardwood Bridge leads toward the Sandstone Steps

Sandstone Steps create an unobtrusive path through the bush setting

Native grasses (Lomandra Tanika) complete the look

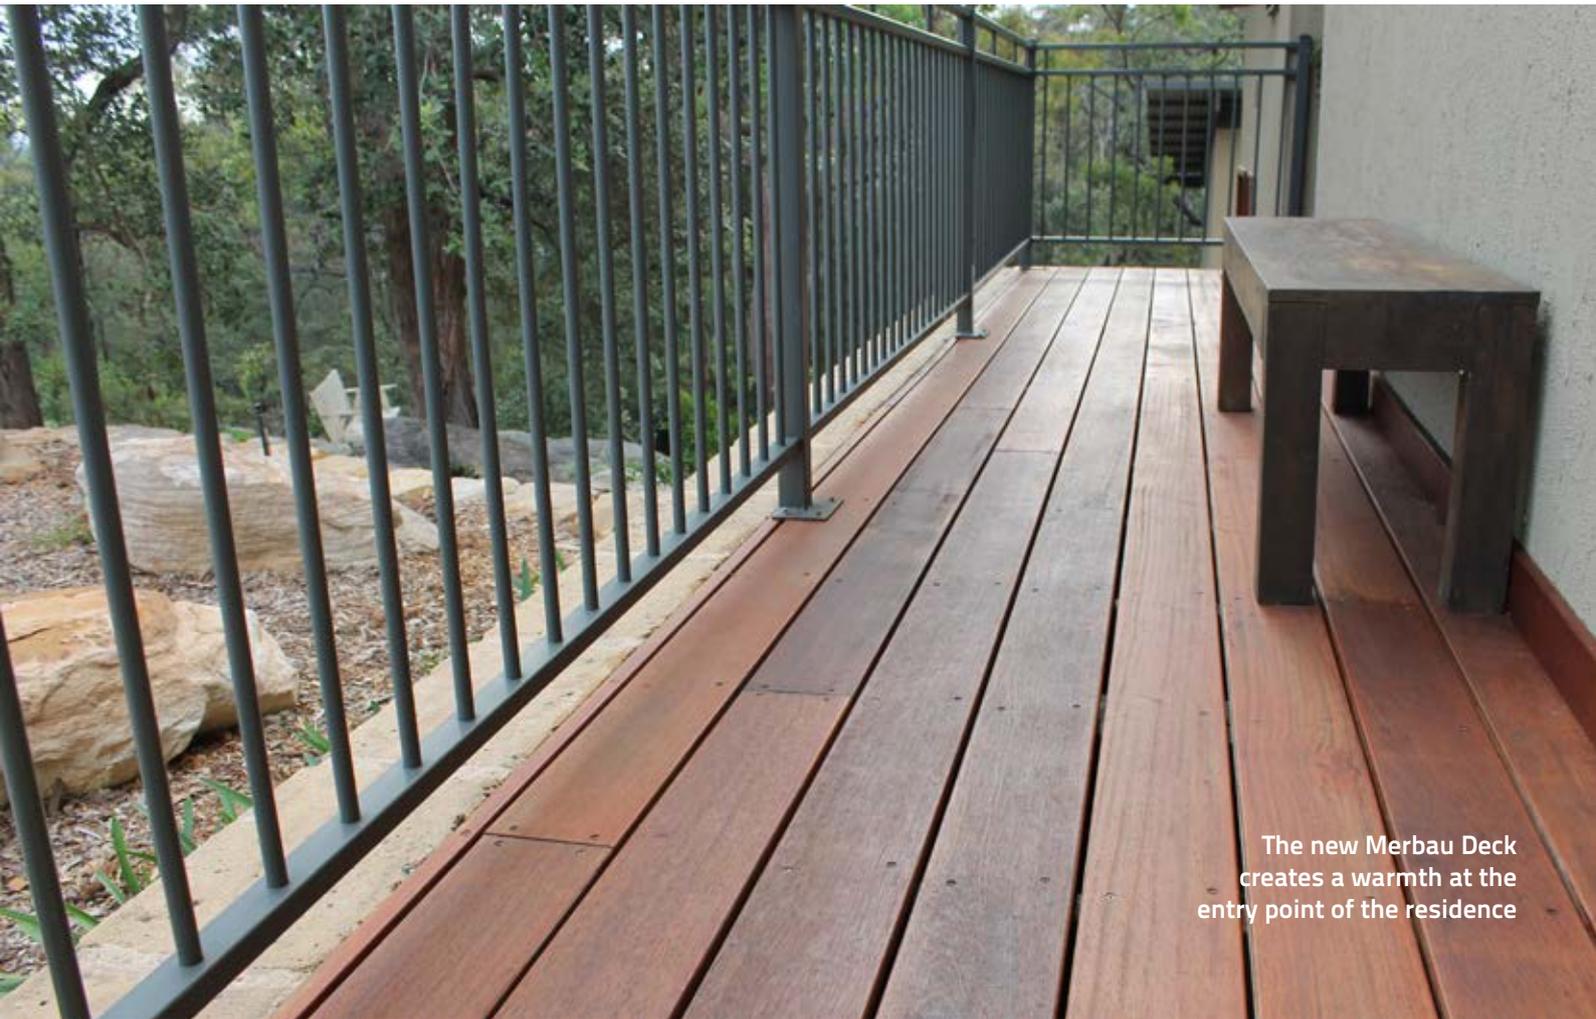

These Decomposed Granite Pathways wind through garden areas and connect garden levels

The Hand-picked Sandstone Boulders were carefully placed to allow for future planting

The new Merbau Deck creates a warmth at the entry point of the residence

The structural integrity of the old front deck had been compromised. New beams and Merbau Decking were installed and oiled to match existing timber work. A complimentary skirting board frames the lower edges of the house walls and colorbond railing was re-installed.

Recycled Brick Driveway in-filled with Round River Pebbles provides a hard-wearing surface for vehicles and defines this Blue Mountains Garden.

The new Timber Arch, Bluestone Pathway, Face Brick Retaining Wall and Camelia Hedge creates a new outdoor room to be enjoyed in this immaculate garden

This old farm tractor was placed for the children's enjoyment on a new softfall rubber surface

These Camelias will grow into a stunning hedge

This new low-maintenance Asphalt surface replaces an eroded Metal Dust Pathway

# Garden Design and Planting

THE LANDSCAPED GARDEN plans and develops your garden areas with you. We work through all the aspects of planting taking into consideration:

- Your chosen theme
- Space
- Maintenance requirements
- Colours
- Foliage
- Contrast
- Size
- All plants that you love

Whether you prefer a Low Maintenance Water-saving Garden, a Classic Native Garden, a Country Cottage Garden, a Modern, Architectural Garden, or a Formal Mountains Garden, THE LANDSCAPED GARDEN has the experience and creativity to design, construct and implement the planting.

A functional Integrated Watering System is necessary in most gardens to ensure your new plants survival. We can build you a system which is easy to use whether it be large or small.

Palmetto Buffalo Lawn edged with Second Hand Bricks and Lomandra Tanika

Anigozanthus (Kangaroo Paw)

Syzigium Hedge will grow up to 3m and provide privacy from the street

This garden was designed for wheelchair access. Elements such as the Timber Retaining Walls, Native Plants and Buffalo Lawns were married in with existing gardens. Functional elements such as replacing old sewer pipes and renewing the storm water system reduced the risk of any future problems. We ensured that the overland flow drainage allows for water to be removed from the property.
